Allowed Claims

1. Claims 1-9 are allowed.

Reasons For Allowance

2. The following is an examiner's statement of reasons for allowance: the closest prior art of Plut (PUB.No. US 2006/0001660 A1) provides for "one video alteration embodiment for LCD use sets a high luminance limit for a histogram of luminance after an alteration. The high luminance limit refers to a reference luminance level for video information in the display area that may be used to guide alteration, e.g., before changing a next backlight luminance on an LCD device. The characteristic color video information may rest near the high luminance limit, while the remaining video information other than the characteristic color video information is altered to a lesser aggregate luminance." See Para. 101 of Plut. Plut failed to teach or suggest for selecting an image region for smoothing attention, within that region further selecting pixels therein which have a luminance value that is on one side, in value, of a defined luminance threshold value, and changing the chrominance-channel values of such selected pixels so as to lower associated chrominance-channel entropy.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
